

INTERNET ACCEPTABLE USE

613

### Rationale

The S V believes that schools must make effective use of new technologies to improve the learning process internet access offers vast diverse and unique resources to both students and teachers which must be used in a responsible manner and which reflects the ission Statement of S Since some educational resources are of more value to students than others and many students have access to the internet at home as well as school parent support is required to monitor the development of responsible student use

### **Policy**

ccess to the internet in all hust occur in a manner that provides all authorized users with opportunity to utilize the technology while at the same time ensuring safeguards are in place to prevent abuse

### Regulation

#### 1. Internet access

nternet access is now available to students teachers and other. Semployees at each school. The internet offers vast diverse and unique resources to both students teachers and other employees and the school is very pleased to make these resources available in particular the school embraces the responsibility of teaching students about their role as network citizens and about the code of ethics involved with the global information community in practical terms, the electronic highway will give our students and teachers access to a wide range of internet applications and services. The following is a representative but not exhaustive list

- electronic mail communication with the education community around the world
- information and news from the scientific community as well as the opportunity to correspond with scientists all over the world
- public domain software of all types
- discussion groups on a variety of educational topics
- access to catalogues and other information in many university and college libraries

With access to information from so many sources nternet users may come into contact with material that would not be considered to have educational value in the context of the school setting—ach school must take precautions to restrict student access to controversial materials—ach school will actively monitor the development of hardware and software solutions to the problems of unrestricted access in certain communities—Where it is deemed appropriate the school will take advantage of available technology—owever given the vast scope and reach of the internet it will remain impossible in the foreseeable future to control all the material available and a user may discover controversial information

INTERNET ACCEPTABLE USE

613

S V is committed to the proposition that the value of the information and interaction available on the internet compensates for the possibility that users may procure material that is not consistent with the educational goals of each school. The benefits to educators and students from access to the internet in the form of valuable information resources and opportunities for collaboration far exceed any disadvantages of access. The S V takes the view that the fact that it is possible to abuse the internet does not represent an invitation to do so

n the matter of student accounts the S V respects the family s right to decide whether or not to apply for access through the home Parents are advised that they should fully inform themselves about the nternet because they are the final arbiters of what is an acceptable level of involvement for their children

Parental permission is a requirement for all prospective student accounts and it is important that parents be fully aware of the potential dangers that can be encountered on the internet. Parents need to understand the expectations that account holders must meet with respect to regulations and ethical behaviour and be prepared to take responsibility for their children's behavior while using the internet. It users of the internet provided with access by the schools are expected to behave in an exemplary fashion, and with due respect for the rules and ethical specifications that appear in this document.

#### Terms and Conditions

Successful operation of the school network requires that authorized users regard the network as a shared resource—t is important that users conduct themselves in a responsible decent ethical and polite manner—The following represent terms and conditions for all authorized users of nternet—counts in—S—V schools

The school network is intended for educational and or research purposes. The use of this account must be to support education and research and must be consistent with the educational objectives of the schools. Uses of other organizations networks or computing resources must comply with the rules appropriate for those networks.

t is the responsibility of every user to respect and protect the privacy and rights of other users in the school network and the nternet community

With respect to electronic mail S V supports the principle of its privacy but cannot guarantee privacy

uthorized users are expected to be aware that there are other users in the school who will want to access the network. The network is a shared resource and must be used in moderation.
